IoT4INDUSTRY

IoT4Industry : New cross-sectoral value chains for EU SMEs

You develop an IoT solution for industries? You look for modernising your PLC? IOT4INDUSTRY project is made for *YOU*!

Iot4industry CALLs for collaborative projects foster the integration and the use of IoT into manufacturing sector. These calls support interregional collaborations between SMEs, large companies and research centers based in European member states or Horizon 2020 associated countries working in the industrial/manufacturing or ICT/IoT domains.

The **first call closed on 20th December**. About 180 companies expressed their interests and 157 proposals have been registered. Projects proposals are now to be assessed until the 14th January 2019. Selected companies will be contacted shortly after this stage and implement their project in 2019.

⏻ PEN 2nd CALL
April 1st - June 11th 2019

IoT training sessions upcoming events

IoT4Industry first training sessions started in Italy on 14th September 2018 and took places in European regions (France, Belgium, Germany, UK). A webinar dedicated to potential projects pitching is available. **WATCH THE VIDEO!** **https://www.youtube.com/watch?v=Oy5i7dOdIfM&t=10s**

2019 IoT4Industry events

EU Industry Days, 5-6 February 2019, Brussels: an excellent opportunity for discussing emerging industrial, societal and environmental trends that may need a response from the EU and discovering IoT4industry 2nd call opportunities

Hannover Messe, 1 - 5 April: world's leading trade fair for industrial technology offering a full range of technical innovations from automation to supplier solutions, the place to exchange and fine-tune your proposal with partners.

Happy Holidays!

IoT4Industry team wishes you a happy holiday season and a Happy New Year!

The key role of Ambassador clusters

Ambassador Clusters are regional entities that are interested in disseminating IoT4Industry project activities and collaborative projects' opportunities beyond the project's consortium's reach. Becoming an Ambassador Cluster provides the possibility to get an early-access to information provided by the IoT4Industry team and further support cluster's members' involvement in the open calls of the IoT4Industry project.

German BalticNet-PlasmaTec (BNPT) and the Portuguese National Portuguese ICT Cluster (TICE.pt) clusters became IoT4Industry Ambassadors.

BNPT is an international cluster – located in Greifswald, focusing on plasma technologies.

TICE.pt, created in 2008, headquarters in Aveiro, mobilises relevant ICT stakeholders throughout Portugal covering the entire value chain, *"to make Portugal a world reference in the ICT – the field of Information and Communication Technologies and Electronics, until 2020"*.
